SUMMARY

With hands-on experience across **Python, SQL, GenAI tools**. I design data workflows that uncover trends, performance patterns, and actionable insights. I combine strong analytical rigor with practical business understanding and effective problem-solving capabilities.

EDUCATION

Shri Ramswaroop Memorial University
Bachelor of Computer Applications (Data Science & AI)

Lucknow, Uttar Pradesh
2024 – 2027

Green View Public School
10th – 12th (CBSE)

Bhadohi, Varanasi
2024

PROJECTS

Product Price Analysis and Visualization | [GitHub Repo](#)

- Developed an end-to-end Python-based system to analyze and visualize product pricing data from CSV and Excel files.
- Performed data cleaning by removing currency symbols, handling missing and duplicate values, and standardizing columns.
- Conducted statistical analysis including average, minimum, maximum price calculations and price-rating correlation.
- Created insightful visualizations such as bar charts, histograms, scatter plots, box plots, and pie charts using Matplotlib.
- Exported cleaned datasets and visual outputs to support data-driven decision-making.
- **Tech Stack:** Python, Pandas, NumPy, Matplotlib

Stock Market Analyzer | [GitHub Repo](#)

- Developed a Stock Market Analyzer application to analyze stock market trends and visualize stock-related data efficiently.
- Implemented features for tracking stock performance, analyzing historical market data, and displaying insights through an interactive interface.
- Designed a clean and user-friendly UI to improve accessibility and simplify financial data analysis for users.
- Organized the project using modular coding practices and maintained project assets, source files, and documentation effectively.
- **Tech Stack:** Python, Data Analysis Libraries, HTML, CSS, JavaScript

Edlii | [GitHub Repo](#) | [Live Demo](#)

- Developed **Edlii**, an educational web platform focused on improving learning accessibility and user engagement through a modern and interactive interface.
- Designed and implemented responsive UI components, smooth navigation, and structured content sections to enhance user experience across devices.
- Built and deployed the project using modern web development practices with optimized frontend performance and clean project architecture.
- Selected for **Incubator 2025 at IIT Delhi**, recognizing the project's innovation, usability, and potential impact in the education technology domain.
- **Tech Stack:** HTML, CSS, JavaScript, Netlify

SKILLS

Programming: Python, SQL (PostgreSQL), C++
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Streamlit
Web Dev: HTML, CSS, Tailwind, JavaScript
Tools: Power BI, Excel, MS Word, Git, VS Code

CERTIFICATIONS & ACHIEVEMENTS

- Shortlisted in **Smart India Hackathon (Internal Round)** among 100+ teams [View Post](#)
- Participated in **GDG Gen AI Hackathon** [Certificate](#)
- Completed **Python for Data Science** Certification by IBM SkillsBuild / Skills Network [Certificate](#)
